

The Kitchen Water Mission

An illustrated storybook preview • Ages 5–9

Welcome to the Kitchen

'Water helps us cook, wash hands, and clean up!' Ranger announced. 'Let's learn to use it wisely,' said Steven.

Rinse the Apples

Rascal held up a shiny apple. 'An adult can help rinse fruits and vegetables under running water,' Steven explained. 'Don't use soap or household cleaners on food.'

The Dishwasher Mystery

A little puddle glimmered beside the dishwasher. 'A clue!' Ranger whispered. 'Maybe a leak,' said Steven. 'Stay away from wet electrical equipment and tell an adult.'

Under the Sink

Ranger peeked at the pipes. 'Lots of connections down there!' 'If you notice a drip, ask an adult to check,' Steven said. 'Never put your hands into a garbage disposal.'

Beep, Beep!

A small water alarm sounded. 'Some alarms detect water touching their sensors,' Steven said. 'They can help notice some leaks, but not all of them.'

Smart Water Habits

'Turn the faucet off when you're finished,' Ranger said. 'And use water from a known safe drinking source for food and drinks,' added Steven.

Junior Kitchen Guardian

'Rinse produce with water, report leaks, and stay away from wet electrical equipment!' cheered the team. Rascal raised his water bottle: 'Mission accomplished!'
